

NGUYEN VAN PHU

SOFTWARE ENGINEERING STUDENT

0899721059 | nguyenvanphu5221@gmail.com | | <https://github.com/nguyenvanphu0509> | Vietnam

PROFILE

Software Engineering student interested in backend development, microservices, distributed systems, and financial technology. Hands-on experience building and testing a microservices-based application using PostgreSQL, RabbitMQ, Docker, REST APIs, and an API Gateway. Eager to apply technical problem-solving skills and grow in a professional banking and technology environment.

EDUCATION

University of Science

Major: Software Engineering

GPA: 8.31/10

87/138 credits

SELECTED PROJECT

Autonomous Career Agent | *Microservices Career Platform*

Built a multi-service career platform covering user authentication, profiles, job data, CV generation, ATS evaluation, cover-letter generation, PDF output, and a frontend interface.

Used RabbitMQ for asynchronous CV and ATS processing, PostgreSQL for persistent data, and an API Gateway for service routing and API access.

Created a repeatable Docker Compose environment with 10 containers, including PostgreSQL, RabbitMQ, backend services, and frontend components.

Practiced unit, integration, and end-to-end testing, including API validation, error handling, persistence checks, message handling, and service orchestration.

TECHNICAL SKILLS

Backend & APIs

REST APIs, API Gateway, microservices concepts, asynchronous workflows

Data & Infrastructure

PostgreSQL, RabbitMQ, Docker, Docker Compose

Programming

Python; familiar with Java and Go,

Tools and Others

Git, GitHub, API testing, unit/integration testing, Firebase, Postman, SOLID, Design Patterns, Agile

LANGUAGES & ADDITIONAL INFORMATION

English: Intermediate - mock IELTS approximately 5.5 (unofficial practice-test result; no official IELTS certificate yet).

Vietnamese: Native.

Strengths: self-learning, analytical thinking, persistence, teamwork, communication, and willingness to learn new technologies.
